

## ABSTRACT

~~METHOD MAKING IT POSSIBLE TO RENDER USER SYSTEM INTERACTION  
INDEPENDENT OF THE APPLICATION AND OF THE INTERACTION MEDIA~~

The method of the invention consists, in a system of the type with three "*tiers*" (~~client 3, application server 2 and database 1~~), in inserting a fourth "*tier*" which is the business interaction ~~[[4]]~~ and which makes it possible to obtain a user-system interaction component that is independent of the services of the application and of the media.
